## PROGRAM

### WHY THIS WORKSHOP IS IMPORTANT

Understanding the key issues faced by industry including off-target damage, product access, market access and more.

### MAXIMISE COVERAGE & MINIMISE LOSS

How does best practice benefit your pest, weed & disease control, your farm economics, your community and the environment?

### FARM REALITIES

Tell us about your spray operations and challenges so we can customise the rest of the day to suit.

### SPRAY SPEAK

Essential terms in spray practices.

### WHAT IS BEST PRACTICE IN 2024 – and how to achieve it

Labels, nozzles, droplet size, drive speed, boom height, managing difficult terrain, weather and more.

### WEATHER WATCH

Leveraging tools for smart spraying decisions.

### COMPLIANCE CONFIDENCE

Meeting your obligations with ease.

### FINDING COMMON GROUND

Negotiation, conflict resolution and having tricky conversations.

### SEALING THE DEAL

A commitment to best practice and take home messages to help you make the best spray decisions possible.

*Also includes...*

**DEMONSTRATION**; Spray quality & droplet behaviour
